LET JUSTICE ROLL DOWN --
DECLARING SUPPORT FOR THE GREEN NEW DEAL
AND AFFIRMING THE INTERSECTIONALITY OF CLIMATE JUSTICE
WITH ALL JUSTICE ISSUES

A Resolution of Witness

Submitted by:
Vermont Conference UCC
Pacific Northwest Conference UCC
New Haven Association of the Connecticut Conference of the United Church of Christ
New York Conference UCC

SUMMARY:

This resolution provides Synod with the opportunity to declare its support for the Green New Deal Resolution (H. Res. 109) released by Congress on February 7, 2019. The Green New Deal creates an opportunity for the United States to commit to goals and projects that are consistent with the UCC’s decades-long advocacy of environmental, racial and economic justice. By declaring its support, Synod will proclaim the intersectionality of climate justice with all justice issues and offer a path of action and hope by which humanity can address the defining moral issues of our time.

BACKGROUND:

With the release of the Green New Deal Resolution on February 7, 2019, Congress created an opportunity for the United States to commit to goals and projects that are consistent with the UCC’s historical (and historic!) advocacy for racial, economic and environmental justice. The Green New Deal aspires to achieve net-zero greenhouse gas emissions, create jobs, provide for a just transition to clean and renewable energy and secure clean air and water.

Recognizing that climate change threatens the safety, health, and dignity of ordinary people, the authors of the Green New Deal have made environmental justice the heart of the resolution. The Green New Deal specifically names the “systemic injustices” that disproportionately affect “frontline and vulnerable communities” and provides a list of such communities that would be familiar to anyone who has read UCC justice resolutions over the past many decades: “indigenous communities, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low income workers, women, the elderly, the unhoused, people with disabilities, and youth.” Indeed, the genius of the resolution is that it identifies and seeks to address two interrelated crises: a climate crisis and a socio-economic crisis of wage stagnation and growing inequality.

In compliance with the Standing Rules of General Synod, this resolution is submitted as a so-called Emergency Resolution because the Congressional Resolution itself (H. Res. 109) was not released until February 7, 2019, well past the January 2, 2019, deadline for Standard Resolutions.
BIBLICAL, THEOLOGICAL AND ETHICAL RATIONALE

Amos 5:24 (NRSV)

24 ... let justice roll down like waters, and righteousness like an ever-flowing stream.

Psalm 24:1 (NRSV)

1 The earth is the LORD’s and all that is in it

Proverbs 29:18 (KJV)

18 Where there is no vision, the people perish

As people of faith, we recognize that the earth is the Lord’s… Nevertheless, Creation, God’s great gift – the context in which all life seeks fulfillment – is in crisis. The scientific consensus is unambiguous. Climate change is real, it’s caused by human activity, it’s already happening, and it’s accelerating. The scale of Creation’s demise is dramatically expanding beyond our comprehension.

The Green New Deal addresses this urgent crisis by offering America a comprehensive vision that, if implemented, can save millions of lives even as it addresses economic inequalities, environmental racism and other manifestations of climate injustice.

Our generation still has the power to bend the moral arc of the universe towards justice by reviving creation. Indeed, by acting with the urgency and on the scale of the Green New Deal, we may still have time to avoid the worst consequences of climate change as we seek to preserve God’s great gift of creation.

TEXT OF THE MOTION

WHEREAS, the Green New Deal is rooted in the scientific findings from the October 2018 Special Report from the Intergovernmental Panel on Climate Changeiii, which declares that carbon emissions must be reduced by about fifty per cent before 2030 and completely phased out before 2050 if global temperature rise is to be limited to 1.5°Celsius;iv

WHEREAS, humanity is already contending with changes on a scale we can hardly comprehend, such as:

- Rainfall from big storms is now measured in feet - not inches (e.g., Houston received five feet (61”) of rain from Hurricane Harvey).v
- The Earth’s temperature is already well into the range that existed during the Eemian period, 120,000 years ago, when sea level was 20 to 30 feet higher than it is now.vi
- The cost of catastrophic, unprecedented flooding in the Midwest in the spring of 2019 is well over $3 billion.vii
- “Not since World War II have more human beings been at risk from disease and starvation than at this very moment.” Climate change is the primary cause of droughts, which are increasingly rendering areas in Africa uninhabitable.viii
Recognizing that the sixth mass extinction in geological history is now underway, biologists are using the term “Biological Annihilation” as species are going extinct at least 100 times the normal rate; ix

WHEREAS, the urgency of the climate crisis is accelerating faster than anyone imagined. For example:
- In January, 2019, scientists learned that the oceans are warming 40% faster than they had previously thought. x
- As the oceans absorb CO₂, they are becoming more acidic at a frightening rate in excess of any change the world has seen in 300 million years; xi

WHEREAS, climate change multiplies and accelerates injustice by hitting the poorest people and people of color first and worst because it’s the poorest people and people of color who typically live in areas most likely to flood, most prone to disease, and most subject to the droughts, heat-waves and various diseases that are now migrating on account of climate change. xii

WHEREAS, climate change is creating and accelerating a health crisis in our inner cities that gets worse each summer, especially as rising temperatures create urban heat islands responsible for more and more cases of asthma that are disabling – and killing – children and elderly people of color. xiii

WHEREAS, those most affected by climate change have not caused it and are powerless to stop it. For example, the farmers in parts of Africa who are losing their lands either to drought or to unprecedented flooding have a carbon footprint that is virtually 1/200th the carbon footprint of the average American; xiv

WHEREAS, the people and institutions who actually caused and are causing climate change aren’t being held accountable for the catastrophic damage climate change is already causing; xv

WHEREAS, the Green New Deal acknowledges the necessity of assuming moral responsibility for intergenerational harm caused by failure to act on climate change and the urgency of taking action on a comprehensive scale to reduce the catastrophe future generations will inherit; xvi

WHEREAS, on March 15, 2019, more than 1,400,000 young people in 128 countries, in over 2,200 cities and towns, and on every continent (including Antarctica) walked out of their schools on a school strike for climate action – the biggest day of global climate action ever – insisting that, in the words of 16-year old Greta Thunberg, initiator of the school strike for the climate and Nobel Prize nominee, “We need a whole new way of thinking...we need to start cooperating and sharing the remaining resources of this planet in a fair way”; xvii

WHEREAS, in 2017, 97% of Synod delegates acknowledged the profound moral implications of climate change by voting to “declare a new moral era,” and committing to the “moral imperative” of urging “clergy to speak from their pulpits about the moral obligation of our generation to protect God’s creation”; xviii
WHEREAS, the two interfaith environmental organizations with which the United Church of Christ partners - Interfaith Power and Light (a national organization with affiliates in almost every state) and Greenfaith - describe the Green New Deal as “a tangible expression of key values that animate [our] vision of a better world” and as “a profound moral opportunity” because the Green New Deal is informed by truth and science, driven by urgency, far reaching in its scale and comprehensive in its goals;¹²

WHEREAS, Yale researchers say 81% of the voters they polled support a Green New Deal to create jobs and work toward renewable energy;xxi

WHEREAS, scores of scientists have spoken out in favor of the Green New Deal, including Stanford Professor Mark Jacobson, whose research demonstrates that each of the 50 states can establish a zero-emissions economy by 2035 and who says, "Right now, we have about ninety per cent or ninety-five per cent of the technology we need…. We don't need a technological miracle to solve this problem. The bottom line is we just need to deploy, deploy, deploy";xxii

WHEREAS, on February 8, 2019, the executive leadership of the United Church of Christ endorsed the Green New Deal;xxiii

WHEREAS, over the past 50+ years the UCC, along with religious leaders from other faiths and denominations, has issued countless statements on the goodness of Creation and our call to act as responsible environmental stewards, all of which has been an insufficient witness;

WHEREAS, the Core Purpose of the United Church of Christ states (in part): “…we serve God in the co-creation of a just and sustainable world as made manifest in the Gospel of Jesus Christ”;xxiv; and

WHEREAS, this historic moment provides Christian communities with a powerful opportunity to bear witness to the sacredness of God’s Creation and the urgent call to preserve it, and responding to this call expresses the new mission initiative of the UCC known as the three great lovesxxv, one of which is love of creation;

THEREFORE, BE IT RESOLVED, that the Thirty-second General Synod of the United Church of Christ, in keeping with numerous resolutions passed by previous General Synods, recognizes the scale and immediacy of the climate crisis, the urgent need to achieve net-zero greenhouse gas emissions as soon as possible, and the moral obligation to embrace the unprecedented socio-economic changes that we must effect and engage as opportunities to create fair paying jobs, secure clean air and water, redress manifestations of environmental racism and pursue a just transition to clean and renewable energy.

BE IT FURTHER RESOLVED, that the Thirty-second General Synod of the United Church of Christ joins the executive leadership of the United Church of Christxxvi and the United Church of Christ Council for Climate Justice (with representatives from all geographic conferences of the UCC) in endorsing the Green New Deal Resolution (H. Res. 109) released as introduced in Congress on February 7, 2019.
BE IT FURTHER RESOLVED, that the Thirty-second General Synod of the United Church of Christ calls upon the whole of the church, understanding the intersectionality of climate change and justice, to accept the moral responsibility that comes with living “at such a time as this” (Esther 4:14) by:

- Standing up for Bear witness to the critical role science must play in understanding the challenges that now pose an existential threat to all forms of life on this planet; as we have known it on this planet;
- Continuing to learn from scientifically informed sources about the new realities and new solutions that are emerging every day;
- Discussing climate change with increasing frequency at church, at home, at work and in our social encounters, emphasizing how it threatens things we all value while noting that we already have all the technology we needxxviii to achieve the goals of the Green New Deal;
- Incorporating into our worship life and community leadership and awareness of climate change, its consequences (especially for the “frontline and vulnerable communities,vulnerable, frontline communities”), and the opportunities we still have to make the changes science says we must and technology says we can;xxix
- Helping our-all communities to be more prepared for extreme weather events and more resilient to the effects of the changing climate in the long-term;
- Lifting up the reality that the majority of many people surveyed, regardless of their political affiliation or allegiance, support the a Green New Deal because it addresses not only climate change but also numerous forms of injustice,xxx
- Paying attention as federal, state and local agencies develop and propose new policies that impact our environment and planet, and engaging those agencies as advocates for policies and legislation that advance the goals of the Green New Deal, including its commitment to address the “systemic injustices” that disproportionately affect “frontline and vulnerable communities”;
- Maintaining a commitment to compassion and fairness by advocating for a just transition for those workers and communities most dependent on fossil fuel energy so that they, too, have opportunities for clean, healthful and family-supporting jobs that heal our planet.

BE IT FURTHER RESOLVED, that the Thirty-second General Synod of the United Church of Christ calls upon the whole of the church to accept that it is up to us to pour ourselves out to bend the moral arc of the universe towards justice, with joy in our hearts, beauty in our sights, and hope for the childrenhealthy and sustainable world, for all children.

FUNDING

Funding for the implementation of this Resolution will be made in accordance with the overall mandates of the affected agencies and the funds available.

IMPLEMENTATION

The Officers of the Church, in consultation with appropriate ministries or other entities within the United Church of Christ, will determine the implementing body.

xxix In H. Res. 109 https://www.congress.gov/bill/116th-congress/house-resolution/109/text, the following text supports this point: Whereas climate change, pollution and environmental destruction have exacerbated systemic
racial, regional, social, environmental, and economic injustices (referred to in this preamble as “systemic injustices”) by disproportionately affecting indigenous peoples, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low-income workers, women, the elderly, the unhoused, people with disabilities, and youth (referred to in this preamble as “frontline and vulnerable communities”);
